

## Contributions to Health Policy

# 10/10

### COMPLETED ANALYSES OF PROPOSED LEGISLATION

All requests from the California Legislature in 2024 were completed in a timely manner on topics including menopause, Medicare, colorectal cancer, human milk, and more.

# 9

### PUBLICATIONS SUPPORTING BILL ANALYSES AND HEALTH POLICY

CHBRP publishes much more than just bill analyses! Each year, resources about California-specific health insurance are updated, and new documents breaking down complex hot topics in health care are published and made available on its website. When appropriate, CHBRP staff works with its taskforce members to publish in scientific journals on work related to CHBRP analyses to help advance the field of public health policy.

## Stakeholder Engagement

### NEW PRODUCT LAUNCHED!

California's health care system is complex. CHBRP released the Health Care Nuts and Bolts product to help break down some of the fundamentals of health care in the state in a digestible format.

Each Nuts and Bolts offering complements other publications on CHBRP's website, such as resources and explainers, in addition to the completed analyses of proposed legislation.

# 40

### STAKEHOLDER MEETINGS

Consistent engagement with stakeholders helps CHBRP ensure its analyses and other publications continue to provide value to its audience and stakeholders.

# 10

### PRESENTATIONS

Staff and task force members presented CHBRP's work through panels, poster sessions, at both in-person and virtual briefings, symposiums, and conferences to help inform stakeholders and share expertise.

UNIQUE VISITORS TO WEBSITE IN 2024

## Mission-Related Accomplishments

### NEW NATIONAL ADVISORY COUNCIL MEMBER

National Advisory Council members, based outside of California, help assure quality and neutrality before CHBRP reports are published. CHBRP is excited to welcome a new member to provide additional expertise and unique insights.

# 4

### STUDENTS HOSTED

CHBRP is committed to helping develop the next generation of health policy experts and professionals. Student interns and assistants not only gain broad exposure to career opportunities with health and public policy, but also receive mentorship and professional development.
